

Bond construction update

Bush Elementary School

April 2021

Voters passed a bond measure in 2018 to fund improvements for Salem-Keizer Public Schools. The bond will support some level of improvement at every school in the district. Bush Elementary School will receive more than \$870,000 in renovations to support music, increase safety and security and protect the public's investment in the school building.

Highlights of the work happening at Bush include:

- Music room improvements
- Creating a secured vestibule to include a visitor-check in space
- Roofing replacement
- Intercom system upgrades
- Expanded wireless capacity
- Electronic badge access system upgrades

Paul Bentley Architects and the district project management team are finished with the design process and have created instructions for construction contractors to use to improve the spaces at our school. The district project management team is now working through the process to select a contractor for Bush's construction project.

Construction is scheduled to begin this summer. As the time for construction approaches, you may notice staging activities for construction taking shape on campus, such as fencing or temporary traffic flow adjustments. Construction is expected to be substantially complete by fall of 2021.

Thanks to the community's support of the bond, Bush will soon have improvements to support a safer learning environment.

A list of projects happening at Bush can be found on the [district website](#). For more information about bond-funded construction in Salem-Keizer Public Schools, please visit www.salemkeizer.org/projects-status.

2018 BOND PROGRAM

EXPAND CTE & SCIENCE

Expand career-technical (vocational) and science education opportunities

RELIEVE OVERCROWDING

Add space to relieve overcrowding, prepare for future enrollment and expand core areas

INCREASE SAFETY & SECURITY

Secure school entries and upgrade electronic badge access systems; increase seismic safety

PROTECT PUBLIC INVESTMENT

Improve existing buildings to ensure longevity of past and present public investments
