

Bond construction update

Myers Elementary School

April 2021

Voters passed a bond measure in 2018 to fund improvements for Salem-Keizer Public Schools. The bond will support some level of improvement at every school in the district. Myers Elementary School will receive more than \$5 million in renovations and additions to help relieve overcrowding and increase safety and security.

Highlights of the work happening at Myers include:

- A new cafeteria and kitchen
- Three new classrooms
- Removal of all portable classrooms
- Heating/ventilation system improvements
- Creating a secured vestibule at the front entry
- Intercom system upgrades and more

CB Two Architects and the district project management team are finished with the design process and have created the final drawings that a construction contractor will use to improve the spaces at our school. The district project management team is now working through the process to select a contractor for Myers' construction project.

Construction is scheduled to begin this summer. As the time for construction approaches, you may notice staging activities for construction taking shape on campus, such as fencing or temporary traffic flow adjustments. Construction is expected to be substantially complete early in the fall of 2022.

Thanks to the community's support of the bond, Myers will soon have improvements to support a safer learning environment with additional space to support students.

A list of projects happening at Myers can be found on the [district website](#). For more information about bond-funded construction in Salem-Keizer Public Schools, please visit www.salemkeizer.org/projects-status.

2018 BOND PROGRAM

EXPAND CTE & SCIENCE

Expand career-technical (vocational) and science education opportunities

RELIEVE OVERCROWDING

Add space to relieve overcrowding, prepare for future enrollment and expand core areas

INCREASE SAFETY & SECURITY

Secure school entries and upgrade electronic badge access systems; increase seismic safety

PROTECT PUBLIC INVESTMENT

Improve existing buildings to ensure longevity of past and present public investments
