

At school and finishing construction

Important information for Richmond parents

Welcome back to school! Construction at Richmond began in the summer and will be finished early this fall.

The construction crew is currently working on renovations in the main office and at the front entry. Some adjustments will be made to building access, but no changes will be made to the bus or parent drop-off/pick-up locations.

Here is some important information to know during construction:

- Staff, students, parents and visitors must **obey all posted signs and stay out of the construction zone.** Do not move fences or ignore signage.
- Don't distract construction workers. **Please allow workers to focus on their jobs and keep themselves and others safe.**
- **Parents and visitors will use a temporary entrance at the back of the school off 24th Street to check in at the office until renovations are complete.** The work is expected to be done by September 20th.
- Students arriving to school after 8 a.m. will need to use the temporary entrance at the back of the building off 24th Street until renovations are complete.

Here are some important reminders for the school year:

- Students will continue to enter the building through the playground gate off Richmond Avenue and in through the courtyard next to the playground.
- Buses will load and unload on Mill Street.
- Parents will continue to drop off students on Richmond Avenue and pick them up on Simpson Street.
- Families that walk to school will continue to pick up students in front of the building on Richmond Avenue near the playground fence.
- Please find available street parking around the building when visiting the school and be aware of the bus loading zone along Mill Street.

Please see the map on the following page for details about entrances and traffic flow.

Construction can cause some temporary disruptions, but the safety and security improvements are an important investment for our students and community.

Thank you for being cautious and staying safe during construction!

2018 BOND PROGRAM

EXPAND CTE & SCIENCE

Expand career-technical (vocational) and science education opportunities

RELIEVE OVERCROWDING

Add space to relieve overcrowding, prepare for future enrollment and expand core areas

INCREASE SAFETY & SECURITY

Secure school entries and upgrade electronic badge access systems; increase seismic safety

PROTECT PUBLIC INVESTMENT

Improve existing buildings to ensure longevity of past and present public investments
