

# At school and under construction

## Important information for Schirle parents

Welcome back to school! Construction at Schirle began in the summer and is expected to be complete early in the fall of 2022.

Schirle will be an active construction site during the school year. Schirle can operate safely while under construction because of careful planning and expert project management by the district and construction teams.

Safety is the top priority for students, staff, parents and visitors while the building is under construction. The contractor has set up fences around campus to help keep everyone safe.

Here is some important information to keep in mind during construction:

- Obey all signs and stay out of the construction zones!
- Don't distract construction workers – allow workers to focus on their jobs to help keep themselves and others safe.
- Please use extra caution when walking, biking or driving near the school and watch for construction vehicles.
- Plywood-covered doorways inside the building near the gym and C pod will block exits into the construction zone.

Construction can cause some temporary disruptions, but the improved learning spaces for students are an important investment and the results will soon outweigh the inconvenience.

Thank you for being cautious and staying safe during construction. More information about bond-funded improvements at Schirle can be found on the [district website](#). Thank you, Salem and Keizer voters for supporting improvements at Schirle!

### 2018 BOND PROGRAM

#### EXPAND CTE & SCIENCE

Expand career-technical (vocational) and science education opportunities

#### RELIEVE OVERCROWDING

Add space to relieve overcrowding, prepare for future enrollment and expand core areas

#### INCREASE SAFETY & SECURITY

Secure school entries and upgrade electronic badge access systems; increase seismic safety

#### PROTECT PUBLIC INVESTMENT

Improve existing buildings to ensure longevity of past and present public investments
