

Bond construction update

Sprague High School

December 2020

Voters passed a bond measure in 2018 to fund improvements across the entire district, including at Sprague High School. Bond funding will support nearly \$43 million in renovations at Sprague to improve safety and security in the school and help relieve overcrowding.

Highlights of the work happening at Sprague include:

- 16 new and renovated classrooms
- Two new science labs
- Two expanded career and technical (vocational) education program spaces
- Additional special education program spaces
- A commons and kitchen expansion
- Relocation of the front office to improve wayfinding and increase visibility of the main entry
- Removal of all portable classrooms
- Additional music support
- Heating/ventilation system improvements

The bond funding will support smaller additions and improvements in other areas as well.

The district's project management team, along with Anderson Shirley Architects and Pence Construction, the Construction Manager/General Contractor hired for Sprague's construction project, is currently working through the last stages of the design process to create the final drawings that the construction team will use to improve and add spaces in the school.

Construction is scheduled to begin in the summer of 2021 and is expected to be complete early in the fall of 2022.

Thanks to the community's support of the bond, Sprague will soon have a safer learning environment and additional space to support our students!

A list of projects happening at Sprague can be found on the [district website](#). For more information about bond-funded construction in Salem-Keizer Public Schools, please visit the [Bond Projects home page](#).

2018 BOND PROGRAM

EXPAND CTE & SCIENCE

Expand career-technical (vocational) and science education opportunities

RELIEVE OVERCROWDING

Add space to relieve overcrowding, prepare for future enrollment and expand core areas

INCREASE SAFETY & SECURITY

Secure school entries and upgrade electronic badge access systems; increase seismic safety

PROTECT PUBLIC INVESTMENT

Improve existing buildings to ensure longevity of past and present public investments
