

Bond construction update

Sprague High School

May 2021

Voters passed a bond measure in 2018 to fund improvements for Salem-Keizer Public Schools. The bond will support some level of improvement at every school in the district. Sprague High School will receive nearly \$43 million in additions and renovations to expand career and technical (vocational) education and science education opportunities, prepare for future enrollment growth, increase safety and security, increase support for special education and music and protect the public's investment in the school building.

Highlights of the work happening at Sprague include:

- 17 new general education classrooms
- Two new science labs
- Three expanded CTE program spaces for Fabrication, Sports Medicine and Computer-Aided Design
- Additional spaces to support special education
- Expanded commons
- Relocated front office for improved security and wayfinding
- New music room, including expanded practice and storage spaces
- Seismic improvements and more

Anderson Shirley Architects and the district project management team are finished with the design process and have created the final drawings that Pence Construction, the construction contractor for Sprague's bond project, will use to improve the spaces at our school.

Construction is scheduled to begin this summer. As the time for construction approaches, you may notice staging activities for construction taking shape on campus, such as fencing or temporary traffic flow adjustments. Construction is expected to be substantially complete early in the fall of 2022.

Thanks to the community's support of the bond, Sprague will soon have improvements to support a safer learning environment and additional space to support CTE program opportunities, special education and science education!

A list of projects happening at Sprague can be found on the [district website](#). For more information about bond-funded construction in Salem-Keizer Public Schools, please visit www.salemkeizer.org/projects-status.

2018 BOND PROGRAM

EXPAND CTE & SCIENCE

Expand career-technical (vocational) and science education opportunities

RELIEVE OVERCROWDING

Add space to relieve overcrowding, prepare for future enrollment and expand core areas

INCREASE SAFETY & SECURITY

Secure school entries and upgrade electronic badge access systems; increase seismic safety

PROTECT PUBLIC INVESTMENT

Improve existing buildings to ensure longevity of past and present public investments
